

let the swan fly in your art design

### Profile of Swanarte Company

Swanarte Company began its activities in year 2015 with a new and modern plan and idea in interior decoration. The aim of Swanarte Company is transformation of internal spaces agreeable to current standards of the world. The company, enjoying collaboration of a capable design team, has offered modern ideas to attract the European and the Asian companies with European management and has won satisfaction of customers.

### 3D Panels

- Ideal for cover of wall and ceiling in designing interior decoration
- Suitable for ugly ceilings and walls
- Usable in sitting rooms, bedrooms, kitchens, back-the-TV walls, conference rooms, lobbies, working rooms, restaurants, and cafes
- Capable of being installed on doors including on entrance doors, cabinet doors, and headboard of beds.
- The 3D panels have been designed specially to make a pattern when are put side by side.
- These panels add an extra dimension to the wall, are agreeable with all types of spaces, and enliven the walls and ceilings

Swanarte presents highest-quality product and support services to the customers at suitable price. Swanarte intends to expand its sale network, trade partners, distributors, and sale agents in Tehran, provinces, and Asian, African, European countries as well as Australia.

### Advantages of 3D Panels

- Modern and stylish
  - More affordable price in Comparison to similar products
  - Using natural leather and artificial leather on back and front sides of the products
  - Selecting diverse models by customers suitable for any leather colour
  - Non-flammable
  - Light-weight
  - Sound Insulator
  - Thermal insulator (heat and coldness)
  - Usable on walls, columns, and ceiling irrespective of their materials
  - Capable of being handled and used repeatedly
  - Waterproof and washable
- In 70 designs, patterns, and models; and offered in 40X40 and 50X50 sizes
- In triangular and hexagonal designs
  - In various and beautiful colours

Undoubtedly, selecting trademark/logo is highly important for any type of organizations, because trademark represent the mission and vision of the organization and communicates its aims. Swan, a very beautiful and dignified bird, is always remembered for being loyal to and travelling with the life-long partner. The loyalty of this bird is symbol of this organization's aim for being perpetually with its addressees. The beauty, the elegant walking of this bird in calm and blue pools among the reflection of stars in water is reminder of duty of the products of this organization in the eye of its audience. Swan is also famous for its habit of not singing alone except before death when he sings at an isolate corner and die. This swansong highlights its perfectionism and willing to get free of any sort of defect or fault, the traits that are common between this bird and our organization.

Zero - formaldehyde

It's perfectly realized and certified to ZERO formaldehyde emissions by SGS.

Secondary use

After period of time, if the panels must be removed, they can be tom off and installed on ther other wall.

Acoustic absorption

The holes in the thick foam are to absorb the sound around.

Water and moisture proof

Because of the excellent pu leather on the back and the bamboo charcoal fiber in the foam, it makes the panels waterproof and moistureproof.

Bend easily

swanarte embodies the professional wisdom when there is the circle or square column or the corner.

Safety

Because the light and soft, even if the wall paint falls off, the panels won't hurt people.

Fire retardant

The fire retardant performance reaches B in EN13501 and was certified by SGS. It also produces very low smoke, and it is the taste of bamboo charcoal after bumng, not irriating.

Soft and high rebound

The panel is composed of high density foam. Its high rebound means not ruffe, never deform. It has excellent Efferct of Collision avoidance.

Sound proof

Because of the sharp 3D inclined blocch face and the high density foam inside, the sound will be faded and absorbed gradually during the rebound between inclined faces.

Easy installation

No board on the wall, and no nail during installation, just use Alkaline Nail-free glue to stick directly, free easy and fast.
